

Java

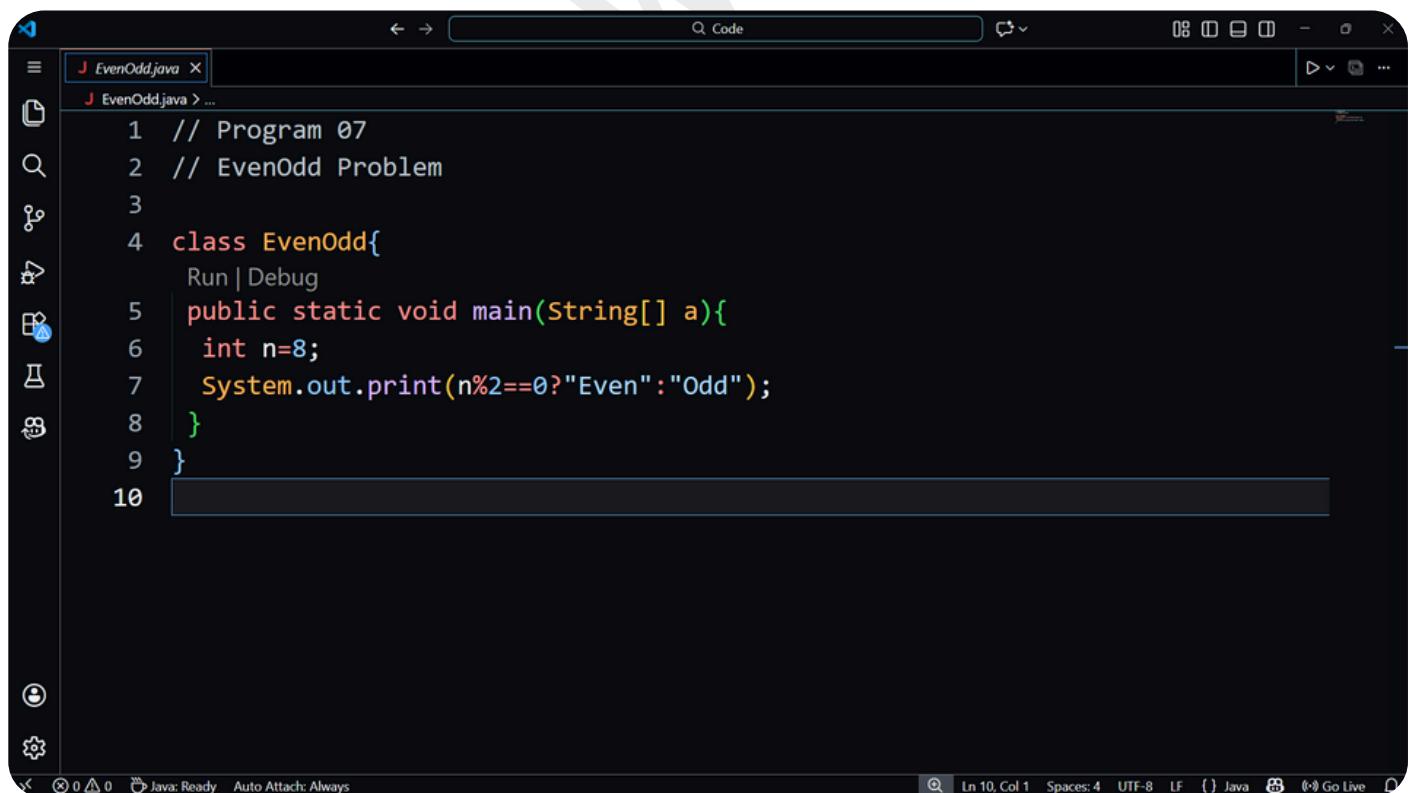

Problem Series

Java Program

Problem Series

7.EvenOdd Problem

Code

A screenshot of a Java code editor showing the contents of a file named `EvenOdd.java`. The code is a simple program that prints "Even" if the number 8 is even, and "Odd" if it is odd. The code is as follows:

```
1 // Program 07
2 // EvenOdd Problem
3
4 class EvenOdd{
5     Run | Debug
6     public static void main(String[] a){
7         int n=8;
8         System.out.print(n%2==0?"Even":"Odd");
9     }
10 }
```

The code editor interface includes a toolbar with icons for file operations, a search bar, and status bars at the bottom indicating "Java: Ready" and "Auto Attach: Always".

Output

```
C:\Windows\System32\cmd.e + ^

D:\system\Java Problem>javac EvenOdd.java

D:\system\Java Problem>java EvenOdd
Even
D:\system\Java Problem>
```
